Professional Profile

Education scholar specializing in language assessment and education policy, with research examining how evaluation practices shape institutional decision-making, educational opportunity, and learner trajectories. Trained in qualitative and quantitative methodologies, I integrate policy analysis, survey research, Rasch measurement modeling, structural equation modeling, experimental design, and computational text analysis to investigate assessment systems across multilingual and high-stakes contexts. I work across platforms including SPSS, Winsteps, Facets, Amos, NVivo, Transana, E-Prime, and R. My work has been published in leading international journals such as *Language Testing* and *Language Assessment Quarterly*, and has received competitive international recognition including the TOEFL Grant for Doctoral Research and the Duolingo Doctoral Dissertation Award. Fluent in written Chinese and English and proficient in Cantonese and Mandarin, I bring cross-regional academic experience spanning North America and Greater China.
